To level the unit:

1. Position the unit at the desired location. Adjustable Glides (W and X) are attached to the bottoms of the legs and the Foot Assembly (Y). Rotate the glides until the unit stands level.

Tipping restraint:

2. Locate two studs in the wall behind the unit. Attach a Clip (T1) to one wall stud with two #8 x 2" Black Screws (T3). See Figure 2a. Attach a second clip to the unit with two #8 x 1" Pan Head Screws (T4). See Figure 2b. Connect the two clips with the Nylon Restraint Strap (T2). **Pull the Nylon Restraint Strap (T2) tight so there is no slack.** See Figures 2c and 2d. Repeat this procedure to attach the second tipping restraint. If you cannot locate two studs, purchase the proper wall attachment hardware for your type of wall and secure the unit.

Unless specifically designed to accommodate, do not set TVs or other heavy objects on top of this product.

This unit has concealed storage. To access:

3. There is a secret storage area in the center drawer (G). To access this storage, open the top right medium drawer (F). Reach in until you find the Hinge (V) that is attached to the bottom of the center drawer. Pull the Hinge forward and then pull the center drawer (G) out far enough so you can access the concealed storage space. To close the drawer, just push it shut. See Figure 3.
